

ITEMS: PAWP101

GREAT AMERICAN'S DOG HYDRANT:

- ★ Thermoplastic rust-proof coating
- ★ Reinforced steel base for surface or ground mount applications
- ★ Accommodates dogs of all sizes

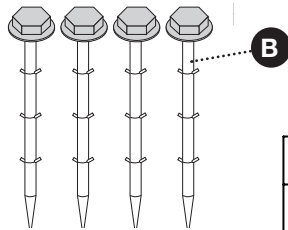

Dog Fire Hydrant

Parts Include:

- A. 1 Fiberglass Hydrant
B. 4 Ground Spikes

Additional Tools Needed: (optional)

- Rubber Mallet

In-ground Installation:

1. To install, gently wet and soften the dirt where you are placing the hydrant and align each of the spikes with the 4 holes in the base.

2. Simply push the spikes into the ground to secure hydrant to grass. If ground is too hard, (gently) use a rubber mallet to finish inserting the spikes until they are flush with the hydrant base.

Note: If installing on concrete surface, use appropriate concrete anchors (not the provided spikes) and affix anchors (per the manufacturer's recommended instructions) through the reinforced steel base.
