

Standing X Banner Kits

Standing X Banner Frame Assembly:

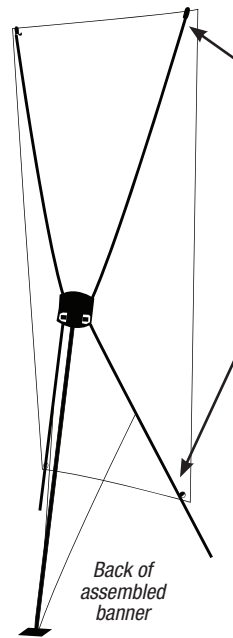

1. Unfold the bottom frame portion (B), straighten legs and extend until taut creating a tripod.
2. Insert the non-hooked end of the two top arms (C) into the openings at the top of the bottom frame.

Hanging your Banner:

1. Attach banner by inserting the hooks located at the end of the top arms into the top grommets on the banner.
2. The bottom frame legs have adjustable hooks that glide up the pole to adjust for the banner size. Gently pull the banner down to hook the lower banner grommets onto the hooks on the bottom legs. Adjust hooks until taut.

Note: The frame is designed to bend—when properly installed the banner frame will arch.

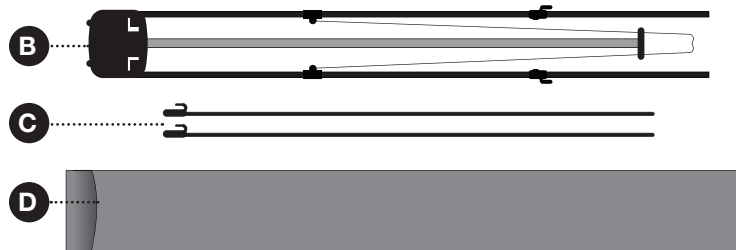

Banner Storage & Care Tips:

Meant for indoor use only.
To clean, wipe with a damp cloth.
Carefully place all parts in storage bag (D) and store in a cool dry location.
